

ISHAQ HANNAN ROZEN

Quality Control Engineer | QA Engineer

+62 882-1073-1718 | hannanrozen4567@gmail.com | LinkedIn | Portfolio | Jakarta

Quality Control Engineer with 1+ year of hands-on experience across the full Software Testing Life Cycle (STLC), requirement analysis, test planning, test case design, execution, defect tracking, and UAT on enterprise web and mobile applications for government and telecommunications clients in Agile, sprint-based SDLC projects. Handled 15+ projects (up to 200+ test cases on major projects), coordinated UAT with client stakeholders, and built Playwright + TypeScript E2E automation that cut regression time on automated flows from 4 hours to 1 hour per cycle. Detail-oriented team player who also mentors QC interns and writes end-user documentation.

EXPERIENCE

PT Javan Cipta Solusi — Yogyakarta, Indonesia (Remote) **Jul 2025 – Present**

Quality Control Engineer (Contract) *Jan 2026 – Present*

Quality Control Intern *Jul 2025 – Dec 2025*

IT consulting company delivering business process automation systems for government and private sectors.

- **Testing across the STLC:** Performed functional, regression, end-to-end, and UAT testing on 15+ government and telecommunications projects (web, Android, and iOS), validating business workflows, multi-role access control, approval flows, and email/in-app notifications.
- **Test design:** Analyzed SRS documents and designed up to 200+ test cases per major project covering positive, negative, and edge-case scenarios using a BDD (Given–When–Then) approach, with traceability to business requirements; organized test plans and test runs per release.
- **Defect management:** Reported, prioritized, and retested 50+ defects per release cycle with clear steps, evidence, and expected results under an H+2 fixing SLA, collaborating with developers and business analysts via ActiveCollab and an internal test management tool.
- **UAT:** Led pre-UAT regression and coordinated UAT sessions with client stakeholders (UAT scripts, minutes of meeting, findings triage), contributing to a 100% UAT pass rate across handled projects.
- **Test automation:** Built Playwright + TypeScript E2E suites for a telecom network-deployment platform, covering multi-role chained flows (vendor assignment → permit → approval) and batch submissions across many cluster IDs; automated ~20% of UAT test cases and reduced regression time on those flows from 4 hours to 1 hour per cycle.
- **Test stability:** Diagnosed flaky test failures through network traces and API response checks, replacing unreliable UI signals with verifiable ones.
- **AI-assisted QA:** Authored reusable AI prompts/skills that apply the team's test case and defect report standards, used with Claude Code and the team's MCP integrations (issue tracker and test management tool) to speed up test authoring and defect reporting; led an AI-assisted Playwright automation pilot and authored an internal engineering report with ROI analysis.
- **Performance testing:** Conducted load testing with JMeter to establish performance baselines before production release.
- **Mentoring & documentation:** Mentored 6+ QC interns on test case design, defect reporting, and regression execution; authored 12 end-user guides as Technical Writer.

PT Amerta Indah Otsuka — Jakarta, Indonesia **Nov 2023 – May 2024**

UI/UX Designer

- Ran usability evaluation (UEQ) on the Otsuka Career website, contributing to 20% shorter task completion time and 50% higher user satisfaction.
- Designed and prototyped internal web applications (AIOnomic login, PROTRACE navigation) with a focus on accessibility — a user-centered perspective now applied to UI and usability testing.

PROJECT HIGHLIGHTS

- **Telecom Network Deployment Platform — E2E Automation** (Telecommunications client, 2025–2026): Playwright + TypeScript suites with page-level fixtures, shared run state across dependent specs, file-upload test data, and network-response assertions for multi-role permit and RFS flows.
- **Email & In-App Notification Regression** (Telecommunications client, 2026): Executed 57-case regression across 7 modules and multiple recipient roles, verifying email summaries in Mailpit against the SRS, including negative scenarios.
- **Business Process Automation System** (Government sector, 2025): Functional and regression testing of workflow-driven modules with multi-role access control; validated transaction logic and approval flows before UAT.
- **Enterprise Internal Management System** (Private sector, 2025): End-to-end functional validation of core modules; verified data accuracy in reports and caught critical defects before production deployment.

EDUCATION & TRAINING

Universitas Negeri Yogyakarta **Sep 2020 – Oct 2024**

Bachelor of Information Technology (S1 Teknologi Informasi) — GPA 3.70 / 4.00

Front-End Web Development Bootcamp — Dibimbing.id **Apr 2025 – Sep 2025**

Final score 92.53 / 100 — HTML, CSS, JavaScript (ES6+), React.js, Git; applied to locator strategy and UI test automation.

UI/UX Independent Study — Productzilla Academy (Kampus Merdeka) **Feb 2023 – Jun 2023**

Final score 82.00 / 100 — UX research, wireframing, prototyping, usability testing.

SKILLS

- **Testing:** Functional, Regression, End-to-End, Smoke & Sanity, Exploratory, API, Cross-browser, UAT, Usability, Mobile (Android/iOS), Load Testing; Negative & Edge-Case Scenarios

- **Methodologies:** SDLC, STLC, Agile/Scrum, BDD (Given–When–Then)
- **Test Design & Documentation:** Requirement/SRS Analysis, Test Plan, Test Case Design (Gherkin), Requirement Traceability, Defect Reporting & Retest, UAT Scripts, User Guides
- **Automation & Tools:** Playwright (fixtures, network assertions, trace debugging, multi-browser projects), TypeScript, JavaScript, Maestro (basic, mobile)
- **Project & Test Management:** ActiveCollab, Taiga, in-house test management tool (test cases, test plans, test runs, defect tracking)
- **AI-Assisted QA:** Claude Code (AI-assisted test authoring & automation), prompt/skill authoring for test case & defect report standards.
- **Soft Skills:** Analytical thinking, attention to detail, teamwork, stakeholder communication, mentoring, time management
- **Languages:** Indonesian (Native), English (Intermediate - professional working)
